Art Unit 1314

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-19 are, drawn to a method of retarding a combustible object from burning, classified in Class 252, subclass miscellaneous.

II. Claims 20-31 are, drawn to an article of manufacture, classified in Class 428, subclass miscellaneous.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case, the product as claimed can be made by a materially different process such as applying the superabsorbent polymer in the form of particulate material in the fabric.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
